Manufacturers Declaration of Compliance and Intended Use
Guaranty and General Compliance Statement

The award-winning products, creative printing solutions and value-added services of OKI include one of the broadest lines of PC peripheral equipment in the industry. OKI continues to find ways to get their clients' messages across in a media-rich world with unique applications to provide effective ways to communicate advertising & promotional messages; leaving a lasting impression on the end consumer. Focusing on retailer's interest to take advantage of various signage applications with cost effective shorter run promotions, OKI is proud to announce conformance of its OKI Data Toners, Pigments, and polyester film substrate for use in and around food.

Following laboratory analysis and testing per FDA Chemistry Guidance for Incidental Food Contact¹, OKI Data Toners, Pigments, and polyester film substrate were found in compliance with FDA and USDA-FSIS (Food Safety and Inspection Services) guidelines for direct and indirect contact with moist food substances including those containing oils and fats. OKI Data printed Information can be used in and around food substances in cold and moist environments. OKI Data Toners have no limitation of use according to Code of Federal Regulations (CFR Title 21, Sec. 178.3297 colorants for polymers) based on pigments (Carbon black, titanium oxide and pigment blue 15) specifically indicated for use and certified safe for use in direct or indirect food contact applications. Further, in connection with pigments yellow 74 and red 122, the solubility and migration measurements in connection with water and fats, both are below the FDA limit for food additives and safe as intended for food contact and direct contact with food substances that contain oil or fat.

OKI Data Toners, Pigments, and polyester film substrate are in compliance with The National Association of Printing Ink Manufacturers (NAPIM) declarations as published in "Printing Inks for Food Packaging" which are based on Food and Drug Administration (FDA) regulatory requirements as listed in Title 21 of the Code of Federal Regulations (CFR). OKI Data printed Information used as intended do not require a "functional barrier" between the printed surface and the food product.
